

**Anatomy Demonstrators/Clinical Fellows (Core), 7 posts in various disciplines:
Plastic Surgery (2), Trauma & Orthopaedics (2), Urology (2), Oral & Maxillofacial Surgery (1)
Plus
Clinical Fellows/Anatomy Demonstrators – 3 posts in ENT**

Applications are invited for the joint role of Anatomy Demonstrator and Clinical Fellow (Core) working with the University of Cambridge Department of Physiology, Development & Neuroscience (PDN) and Cambridge University Hospitals NHS Foundation Trust (CUH). These posts are available to commence on 05 August 2020 for a period of 12 months.

The 7 Anatomy Demonstrator/Clinical Fellow post holders will take part in a dissecting-room teaching programme of Topographical Anatomy for Preclinical Medical Students and will be attached to the relevant CUH surgical departments. All post holders will participate in the full shift rota of their department providing long day and night cover only during University term time. When not in the Human Anatomy Centre (outside term) you will participate in the daytime commitments of the clinical service including theatre lists, clinics, and ward cover. Clinical commitments vary between specialties and will be appropriate for the relevant clinical area. These posts will allow the successful candidate to acquire many of the essential and desirable criteria for national specialty selection. The posts do not carry Postgraduate Dean's approval of training recognition but offer the opportunity to gain teaching experience in a supervised environment, receive teaching from experienced senior staff, produce anatomical prosections and participate in research projects.

In addition, 3 Clinical Fellow (Core) / Anatomy Demonstrator posts are offered in the ENT Department with a combined rota of anatomy demonstrating and clinical roles. The successful applicant will take part in a clinical ENT rota including the on-call rota. They will have the opportunity to gain anatomy teaching experience in a supervised environment, receive teaching from senior staff, produce prosections and participate in research projects. Within the ENT department, applicants will be able to take part in audit, research and other educational activities while improving clinical knowledge all relevant to further core or higher surgical training. They will be allocated a supervisor to ensure they get the best out of their one year appointment. The posts do not carry Postgraduate Dean's approval of training.

Applicants must have achieved their Foundation Competencies or equivalent and have demonstrable skills in listening, reading, writing and speaking in English that enable effective communication about medical topics with patients and colleagues, as in the GMC's Good Medical Practice (2013). Whilst the recruitment process is managed by the University of Cambridge, contracts of employment for all these posts will be held by Cambridge University Hospitals NHS Foundation Trust.

Applications should be submitted no later than Sunday 1 March 2020. Late applications will not be accepted. Interviews will be held on 25 March 2020.
