

MVST 1A HOM booklist (2014)  
Christof Schweining

No specific list. There is no specific course textbook.

Each individual lecturer suggests a few books at the start of their series. There are many, many Physiology textbooks. Here are a few that all libraries should have copies of (they are all recommended by at least one lecturer on the course).

It is recommended that students buy at least one of the major ones - e.g. Boron and Boulpaep.

\*\*\*\*\*

Medical Physiology, Boron and Boulpaep (W.B. Saunders Company)

Human Physiology: The Basis of Medicine, Richards & Pocock (Oxford University Press, USA)

Textbook of Medical Physiology, Guyton & Hall (W.B. Saunders Company)

Physiology, Berne & Levy (Mosby-Year Book)
